## **Critical Issues in Air Transport Economics and Business (Routledge Studies in the Modern World Economy) From Routledge**

This book offers material for strategic thinking featuring contributions from key figures in Europe, the US and Asia. The focus of the book expands from economic to legal issues, bankruptcy and safety and security. The carefully selected papers offer a thorough and structured analysis of major current developments in the air transport industry. Fully up to date, topics covered include competitive strength, capacity utilisation and risk.

The most likely future scenarios are more or less known. Only, the timeframe remains uncertain. The speed at which the various market players in the air transport chain will implement their strategies remains the key question. This depends on a whole range of exogenous and endogenous variables, as this book aspires to demonstrate. As both an overview of the current issues affecting the industry and as a cohesive set of strategic documents, therefore, this collection will prove invaluable for policy makers and researchers alike.
