## Regulation of Organelle and Cell Compartment Signaling: Cell Signaling Collection From Academic Press

This must-have cell signaling title will appeal to researchers across molecular biology, biochemistry, cell biology and genetics. The articles are written and edited by experts in the field and emphasize signaling to and from intracellular compartments including transcriptional responses to cytoplasmic and nuclear signaling events, chromatin remodeling and stress responses, the regulation of endoplasmic reticulum function, control of cell cycle progression and apoptosis and the modulation of the activities of mitochondria and other organelles.

- Articles written and edited by experts in the field
- Thematic volume covering regulation of endoplasmic reticulum function, regulation of cell cycle progression, and quality control and assurance in mitochondrion events
- Up-to-date research on events in membrane proteins and proteins of intracellular matrix
