Design of Feedback Control Systems (Oxford Series in Electrical and Computer Engineering) By Raymond T. Stefani, Bahram Shahian, Clement J. Savant, Gene H. Hostetter

Design of Feedback Control Systems is designed for electrical and mechanical engineering students in advanced undergraduate control systems courses. Now in its fourth edition, this tutorial-style textbook has been completely updated to include the use of modern analytical software, especially MATLAB®. It thoroughly discusses classical control theory and state variable control theory, as well as advanced and digital control topics. Each topic is preceded by analytical considerations that provide a well-organized parallel treatment of analysis and design. Design is presented in separate chapters devoted to root locus, frequency domain, and state space viewpoints. Treating the use of computers as a means rather than as an end, this student-friendly book contains new "Computer-Aided Learning" sections that demonstrate how MATLAB® can be used to verify all figures and tables in the text. Clear and accessible, *Design of Feedback Control Systems, Fourth Edition*, makes complicated methodology comprehensible to a wide spectrum of students.

Features

- Keyed to today's dominant design tool, MATLAB®
- Includes drill problems for gauging knowledge and skills after each topic
- Provides state-of-the-art design examples
- Uses marginal summaries to guide the reader
- Introduces new ideas in the context of previous material, with a guide to the information that follows
- Presents practical examples of the latest advances in control sciences

Editorial Review

Review

"An excellent text book that explains the basic concepts to the beginner in a very lucid way, yet goes on to cover many advanced topics in sufficient detail."--Ajeet Singh, DeVry Technical Institute

About the Author

Raymond T. Stefani, Bahram Shahian, and Gene Hostetter are all at California State University, Long Beach.

Users Review

From reader reviews:

Brandon Inouye:

Do you considered one of people who can't read gratifying if the sentence chained from the straightway, hold on guys this aren't like that. This Design of Feedback Control Systems (Oxford Series in Electrical and Computer Engineering) book is readable by you who hate those straight word style. You will find the information here are arrange for enjoyable reading experience without leaving even decrease the knowledge that want to deliver to you. The writer associated with Design of Feedback Control Systems (Oxford Series in Electrical and Computer Engineering) content conveys the idea easily to understand by lots of people. The printed and e-book are not different in the information but it just different in the form of it. So , do you nonetheless thinking Design of Feedback Control Systems (Oxford Series in Electrical and Computer Engineering) is not loveable to be your top listing reading book?

James Jones:

Nowadays reading books become more than want or need but also become a life style. This reading habit give you lot of advantages. The huge benefits you got of course the knowledge the actual information inside the book that improve your knowledge and information. The knowledge you get based on what kind of publication you read, if you want attract knowledge just go with training books but if you want feel happy read one together with theme for entertaining like comic or novel. The particular Design of Feedback Control Systems (Oxford Series in Electrical and Computer Engineering) is kind of guide which is giving the reader unstable experience.

Lorraine Wheat:

Do you have something that you enjoy such as book? The book lovers usually prefer to decide on book like comic, brief story and the biggest one is novel. Now, why not seeking Design of Feedback Control Systems (Oxford Series in Electrical and Computer Engineering) that give your pleasure preference will be satisfied simply by reading this book. Reading habit all over the world can be said as the method for people to know world a great deal better then how they react towards the world. It can't be said constantly that reading

behavior only for the geeky particular person but for all of you who wants to be success person. So , for all of you who want to start looking at as your good habit, it is possible to pick Design of Feedback Control Systems (Oxford Series in Electrical and Computer Engineering) become your personal starter.

Eduardo Fernandez:

Reading a reserve make you to get more knowledge from that. You can take knowledge and information coming from a book. Book is composed or printed or highlighted from each source that filled update of news. In this modern era like currently, many ways to get information are available for a person. From media social just like newspaper, magazines, science reserve, encyclopedia, reference book, new and comic. You can add your knowledge by that book. Ready to spend your spare time to open your book? Or just trying to find the Design of Feedback Control Systems (Oxford Series in Electrical and Computer Engineering) when you necessary it?
