Atlas of Implantable Therapies for Pain Management By Timothy R Deer

This Atlas serves as a guide to beginning implanters, intermediate implanters, and the most advanced practitioners. The author covers the process of implanting and managing spinal cord stimulators, peripheral nerve stimulators, and intrathecal pumps from the beginning of the process to long term management. The book also discusses the recognition, prevention, and management of complications. The Atlas is a must for any physician hoping to improve their skills in any segment of this important area of interventional pain treatment. The combination of instructional photographs and detailed instructions makes each segment a great learning event.

Editorial Review

Review

From the book reviews:

“This is an excellent review and photo illustration on how to use implantable devices for spinal derived pain. ... Students, residents, and fellows could benefit from this publication. I recommend this book for pain researchers, neurosurgeons, and neurologists.” (Joseph J. Grenier, Amazon.com, September, 2014)

“This book is edited and half written by a widely published Anesthesiologist and has contributions from eleven North American and one European specialist implanters, half of whom are anesthesiologists and half neurosurgeons. ... covered a lot of ground within the field of implantable therapies. ... For the practitioner new to the field of implantable therapies this book shows the scope of this particular branch of pain medicine. It is full of good advice on techniques and how to avoid complications.” (British Journal of Clinical Pharmacology, June, 2011)

“This illustrated manual of implantable therapies for pain combines text and images to provide a quick review of each pain procedure. The purpose is to provide a handy quick reference for implantable pain therapies. ... All practicing pain physicians, whether their background is in anesthesia or neurosurgery, will find it very useful. ... The book is beautifully written and well illustrated with x-ray images and pictures. ... this book is must read for every pain fellow and a very useful one for every pain physician.” (Tariq M. Malik, Doody’s Review Service, February, 2011)

From the Back Cover

Atlas of Implantable Therapies for Pain Management This atlas is an essential guide for all implanters, from beginners to the most advanced practitioners. The process of implanting and managing spinal cord stimulators, peripheral nerve stimulators, and intrathecal pumps, from the beginning through long-term management, is thoroughly discussed, as are the prevention and management of complications. Extensive photographs and detailed instructions make each segment a great learning event. The *Atlas of Implantable Therapies for Pain Management* is a “must-have” resource for any physician wishing to improve his or her skills in interventional pain treatment. **ABOUT THE AUTHOR** **TIMOTHY DEER, MD**, is President and Chief Executive Officer of the Center for Pain Relief in Charleston, West Virginia and Clinical Professor of Anesthesiology, West Virginia University School of Medicine, Morgantown.
