Environmental Science By William Cunningham, Mary Cunningham

Environmental Science: A Global Concern is a comprehensive presentation of environmental science for non-science majors which emphasizes critical thinking, environmental responsibility, and global awareness. This book is intended for use in a one or two-semester course in environmental science, human ecology, or environmental studies at the college or advanced placement high school level. As practicing scientists and educators, the Cunningham author team brings decades of experience in the classroom, in the practice of science, and in civic engagement. This experience helps give students a clear sense of what environmental science is and why it matters in this exciting, new 13th edition.

Environmental Science: A Global Concern provides readers with an up-to-date, introductory global view of essential themes in environmental science. The authors balance evidence of serious environmental challenges with ideas about what we can do to overcome them. An entire chapter focuses on ecological restoration; one of the most important aspects of ecology today. Case studies in most chapters show examples of real progress, and “What Can You Do?” lists give students ideas for contributing to solutions.

Editorial Review

About the Author

Mary Ann Cunningham teaches geography and geographic information systems (GIS), and environmental studies at Vassar College, Poughkeepsie, NY. Her research involves using GIS to assess landscape-level problems in conservation and biodiversity. In particular, she is interested in understanding the nature of fragmentation in grassland environments and the effects of fragmentation on the make-up of bird communities. The agricultural landscapes where she has been working represent a complex and fascinating interaction of issues concerning working landscapes, resource use, remnant wildlife habitat, and landscape aesthetics. It is at the intersection of these issues that she likes to try and understand the geography of physical environments. Mary Ann earned a PhD in Geography at the University of Minnesota, an MA in Geography at the University of Oregon, and a BA in Geology at Carleton College.

William Cunningham is an Emeritus Professor at the University of Minnesota where he taught for 36 years in the Departments of Botany and Genetics and Cell Biology as well as the Conservation Biology Program, the Institute for Social, Economic, and Ecological Sustainability, the Center for Environmental Learning and Leadership, and the McArthur Program in Global Change. He received his Ph.D. in Botany from the University of Texas in 1963 and spent two years at Purdue University as a postdoctoral fellow. At various times, he has been a visiting scholar in Sweden, Norway, Indonesia, and China, as well as several universities and research institutions in the United States.

Dr. Cunningham has devoted himself to education and teaching development at the undergraduate level in biology. He began his educational career in structural biology but for the last 10-15 years has concentrated on environmental science, teaching courses such as Social Uses of Biology; Garbage, Government, and the Globe; Environmental Ethics; and Conservation History. Within the past four years, he has received both of the two highest teaching honors that the University of Minnesota bestows -- The Distinguished Teaching Award and a \$15,000 Amoco Alumni Award. He has served as a Faculty Mentor for younger faculty at the university, sharing the knowledge and teaching skills that he has gained during his distinguished career.

Users Review

From reader reviews:

Willette Bickel:

Do you have favorite book? In case you have, what is your favorite's book? Reserve is very important thing for us to learn everything in the world. Each guide has different aim or goal; it means that publication has different type. Some people feel enjoy to spend their time to read a book. These are reading whatever they have because their hobby is definitely reading a book. Why not the person who don't like reading through a book? Sometime, man or woman feel need book whenever they found difficult problem as well as exercise. Well, probably you will need this Environmental Science.

Arielle Griffin:

Within other case, little people like to read book Environmental Science. You can choose the best book if you'd prefer reading a book. So long as we know about how is important the book Environmental Science. You can add expertise and of course you can around the world with a book. Absolutely right, because from book you can learn everything! From your country until eventually foreign or abroad you can be known. About simple matter until wonderful thing you could know that. In this era, we could open a book or perhaps searching by internet gadget. It is called e-book. You should use it when you feel bored stiff to go to the library. Let's go through.

Maria Swensen:

Reading can called head hangout, why? Because if you find yourself reading a book mainly book entitled Environmental Science your mind will drift away trough every dimension, wandering in most aspect that maybe unknown for but surely might be your mind friends. Imaging just about every word written in a book then become one application form conclusion and explanation this maybe you never get ahead of. The Environmental Science giving you a different experience more than blown away your head but also giving you useful data for your better life within this era. So now let us teach you the relaxing pattern this is your body and mind are going to be pleased when you are finished looking at it, like winning a. Do you want to try this extraordinary wasting spare time activity?

Harold Fleming:

This Environmental Science is great guide for you because the content that is full of information for you who all always deal with world and also have to make decision every minute. This specific book reveal it data accurately using great manage word or we can claim no rambling sentences within it. So if you are read the idea hurriedly you can have whole data in it. Doesn't mean it only provides you with straight forward sentences but hard core information with beautiful delivering sentences. Having Environmental Science in your hand like having the world in your arm, information in it is not ridiculous 1. We can say that no guide that offer you world within ten or fifteen moment right but this e-book already do that. So , it is good reading book. Hi Mr. and Mrs. active do you still doubt that?
