Now in its fourth edition, this core textbook continues to provide a comprehensive, systematic guide to the examination and assessment of patients with neuromusculoskeletal dysfunction. The new edition continues with Nicola Petty at the helm but she is now joined by a reputable team of specialized clinicians and academics who have contributed to individual chapters.

Neuromusculoskeletal Examination and Assessment focuses on the development of technical and clinical reasoning skills involved in differential diagnosis of joint, nerve and muscle tissues. It is designed for physiotherapy/manual therapy students and their teachers but is also ideal for those in the first years of their practice as an educational support for patient care.

- Provides a logical approach to patient examination to enhance clinical reasoning
- Presents key concepts of leading therapists and researchers in the field of manual therapy
- Emphasizes a patient-centred approach
- Templated step-by-step sequence of illustrations and text creates an accessible tool for use in teaching and practice
- New 2-colour drawings and photographs visually demonstrate techniques

Editorial Review

Review

"It would be an asset for all undergraduate students and of interest to those returning to the profession. I would recommend this book for all those working in the musculoskeletal field for its relevance in coordinating many techniques of examination and for encouraging practitioners to be flexible in their approach." Physical Therapy in Sport, No 3, January 2002
