Auditions: Architecture and Aurality (MIT Press)

By Rob Stone

Auditions: Architecture and Aurality (MIT Press) By Rob Stone

In *Auditions*, Rob Stone proposes a new and transformative view of architecture and sound. He offers a radical rethinking of the inhabitation of architectural space in terms of its acoustic dimensions, presenting a concept of aurality as an active, speculative, yet conditional understanding of the complexity of social spaces. The aural architectures he discusses are assembled from elements of architecture and music -- including works by Ludwig Mies van der Rohe and John Cage -- but also from imagined spaces and other kinds of less obviously musical sounds.

Stone presents a series of aural-architecture moments, each of which brings architectural space into conversational relationships with extra-architectural concepts and perceptions, often suggested by other art forms and social practices. He considers, for example, the acoustic themes of a silent movie; Greg Louganis's failed dive at the Seoul Olympics and the moral values attached to water in architecture; the custodianship of high culture at a second-hand classical record shop in London; and hair (as in the conductor's hairstyle) as a mediating form between music and architectural space.

In *Auditions*, Stone brings together and revises the canonical instances of sound's relationships with architectural spaces, and he does so by granting new kinds of spatial agency to sound. Sound is not only a portal into otherwise imperceptible aspects of architecture but also a reflection on the concepts that produce our expectations of architecture.

Editorial Review

Review

Rob Stone deftly maneuvers through an array of cultural phenomena -- from audible accidents to buildings to swimming pools -- by way of aural association. *Auditions* reorients our view of modernity, affording opportunities for hearing its architectures to discover a labyrinth of acoustical fugitivity.

(Brandon LaBelle, author of *Acoustic Territories: Sound Culture and Everyday Life* and *Background Noise: Perspectives on Sound Art*)

Through a beguiling arrangement of sensate experience, erudition, cogitation, and nerve, Rob Stone offers a resonant networked narrative that guides us to a greater understanding and awareness of what aural-architecture may be, with a particular focus on modernist culture in all its complexity. This vivacious contribution to an emerging field is attained via Stone's insightful familiarity with the materials that he exploits despite disciplinary vicissitudes, be that architectural history, psychoanalysis, experimental music, opera, or acoustics.

(John Levack Drever, Professor of Acoustic Ecology and Sound Art, Goldsmiths, University of London)

" *Auditions* conducts a highly original and generative enquiry into the folding of acoustic and architectural space. The book traverses a rich seam of material from modern and post-modern buildings, dormitory towns, classic operas, avant-garde compositions, and technical developments in sound recording, to the hairstyles of great conductors. These and an array of other cultural references are brought into unexpected juxtapositions, elegantly threaded through with ideas and associations that produce a composition, which is nevertheless porous and open for interpretation. This book is a delight to read and is something like a work of art in its own right in its ability to transform the meaning of things with nuance and poetic invention.

(Grant Watson, Curator and Lecturer in Curatorial Theory, Royal College of Art, London)

About the Author

Rob Stone is Associate Professor in Critical and Cultural Studies at Emily Carr University of Art and Design, Vancouver, and a founding editor of *The Journal of Visual Culture*. He established the MA program in Aural and Visual Cultures and the Centre for Research Architecture at Goldsmiths College, University of London.

Users Review

From reader reviews:

Edward Phillips:

The book Auditions: Architecture and Aurality (MIT Press) make you feel enjoy for your spare time. You need to use to make your capable much more increase. Book can to get your best friend when you getting strain or having big problem with your subject. If you can make examining a book Auditions: Architecture

and Aurality (MIT Press) being your habit, you can get a lot more advantages, like add your own capable, increase your knowledge about many or all subjects. You are able to know everything if you like available and read a publication Auditions: Architecture and Aurality (MIT Press). Kinds of book are several. It means that, science publication or encyclopedia or others. So , how do you think about this e-book?

Margaret Watkins:

The book Auditions: Architecture and Aurality (MIT Press) will bring that you the new experience of reading some sort of book. The author style to clarify the idea is very unique. In the event you try to find new book to read, this book very appropriate to you. The book Auditions: Architecture and Aurality (MIT Press) is much recommended to you to see. You can also get the e-book from official web site, so you can more easily to read the book.

Dawn Dustin:

This Auditions: Architecture and Aurality (MIT Press) is completely new way for you who has fascination to look for some information since it relief your hunger info. Getting deeper you on it getting knowledge more you know or you who still having small amount of digest in reading this Auditions: Architecture and Aurality (MIT Press) can be the light food for you personally because the information inside this book is easy to get by simply anyone. These books develop itself in the form that is certainly reachable by anyone, yeah I mean in the e-book application form. People who think that in guide form make them feel tired even dizzy this publication is the answer. So there isn't any in reading a e-book especially this one. You can find actually looking for. It should be here for you actually. So , don't miss the idea! Just read this e-book style for your better life along with knowledge.

Myrtle Galloway:

As a university student exactly feel bored to help reading. If their teacher expected them to go to the library or make summary for some guide, they are complained. Just minor students that has reading's spirit or real their hobby. They just do what the educator want, like asked to the library. They go to right now there but nothing reading really. Any students feel that reading through is not important, boring and can't see colorful photographs on there. Yeah, it is being complicated. Book is very important for you. As we know that on this period of time, many ways to get whatever we wish. Likewise word says, ways to reach Chinese's country. Therefore , this Auditions: Architecture and Aurality (MIT Press) can make you sense more interested to read.
