## Algebra and Trigonometry Enhanced With Graphing Utilities (4th Edition)

By Michael Sullivan, Michael SullivanIII

This is the number one, best selling graphing-required version of Mike Sullivan's precalculus series. It is used by thousands of students and hundreds of instructors because, simply, "IT WORKS." "IT WORKS for both instructors and students because Mike Sullivan, after twenty-five years of teaching, knows exactly what students need to do to succeed in a math class and he therefore emphasizes and organizes his text around the fundamentals; preparing, practicing, and reviewing. Students who prepare (read the book, practice their skills learned in previous math classes), practice (work the math focusing on the fundamental and important mathematical concepts), and review (study key concepts and review for quizzes and tests) succeed in class. Instructors appreciate this emphasis as it supports their teaching goals to help their students succeed as well as appreciate the fact that this dependable text retains its best features--accuracy, precision, depth, strong student support, and abundant exercises, while substantially updating content and pedagogy. After completing the book, students will be prepared to handle the algebra found in subsequent courses such as finite mathematics, business mathematics, and engineering calculus.

### Editorial Review

#### About the Author

**Mike Sullivan** Professor of Mathematics at Chicago State University received a Ph.D. in mathematics from Illinois Institute of Technology. Mike has taught at Chicago State for over 30 years. He is a native of Chicago's South Side and currently resides in Oaklawn. Mike has four children. The two oldest have degrees in mathematics and assisted in proofing, checking examples and exercises, and writing solutions manuals for this project. Mike III co-authored the Sullivan *Graphing with Data Analysis* series as well as this series. Dan, the youngest, sells for Prentice Hall as a generalist.

Mike has authored or co-authored over ten books. He owns a travel agency, and splits his time between a condo in Naples, Florida and a home in Oaklawn, where Mike enjoys gardening. Mike first signed this series with Deleen Publishing (Acquired by Macmillan) in 1985.

**Mike Sullivan III** is a professor of mathematics at Joliet Junior College. He holds graduate degrees from Depoit University in both mathematics and economics. Mike has co-authored both of the Sullivan graphing series and collaborated with his sister to author supplements for all of the Sullivan series. Mike has recently authored a brand new successful Statistics book for Prentice Hall *Fundamentals of Statistics, 1/e 2005 and Statistics: Informed Decisions Using Data, 1/e, 2004*. Mike is currently working on a developmental math series for Prentice Hall that will be published in 2007. Mike is the father of three children. He is an avid golfer and tries to spend as much of his limited free time as possible on the golf course.

#### Why We Wrote the Book:

Work on this series began with a unique perspective. Teaching at a large urban institution and a smaller two-year college has allowed us to see firsthand the challenges associated with teaching students with diverse backgrounds in an urban setting. Successful textbooks must be accessible to students. As lead author of this series, one of the most important things I bring to the project is my experience as author of a successful calculus text. Mike and I are both aware that students must be prepared in a Precalculus course for subsequent mathematics courses. We also realize that many College Algebra students will not be going on to take upper level math courses. In this series we resolved the seeming dilemma without sacrificing accessibility.

The books in this series are designed to be mathematically comprehensive and to provide substantial mathematical preparation for subsequent courses. At the same time, great effort has been expended to motivate the material and to make it accessible to even poorly prepared students.

### Users Review

#### From reader reviews:

#### David Sweet:

The book untitled Algebra and Trigonometry Enhanced With Graphing Utilities (4th Edition) contain a lot of information on the idea. The writer explains her idea with easy way. The language is very clear and

understandable all the people, so do certainly not worry, you can easy to read the item. The book was published by famous author. The author will bring you in the new age of literary works. You can read this book because you can keep reading your smart phone, or device, so you can read the book with anywhere and anytime. In a situation you wish to purchase the e-book, you can wide open their official web-site as well as order it. Have a nice learn.

### **Roberto Reyes:**

In this era globalization it is important to someone to acquire information. The information will make professionals understand the condition of the world. The healthiness of the world makes the information much easier to share. You can find a lot of referrals to get information example: internet, newspaper, book, and soon. You can view that now, a lot of publisher in which print many kinds of book. Typically the book that recommended to your account is Algebra and Trigonometry Enhanced With Graphing Utilities (4th Edition) this publication consist a lot of the information of the condition of this world now. This kind of book was represented how does the world has grown up. The dialect styles that writer value to explain it is easy to understand. The particular writer made some investigation when he makes this book. Honestly, that is why this book acceptable all of you.

### **Rebecca Dryden:**

That e-book can make you to feel relax. This particular book Algebra and Trigonometry Enhanced With Graphing Utilities (4th Edition) was colourful and of course has pictures on the website. As we know that book Algebra and Trigonometry Enhanced With Graphing Utilities (4th Edition) has many kinds or type. Start from kids until teens. For example Naruto or Investigation company Conan you can read and believe that you are the character on there. So , not at all of book are make you bored, any it offers up you feel happy, fun and relax. Try to choose the best book in your case and try to like reading in which.

### **Theodore Rivas:**

Many people said that they feel weary when they reading a guide. They are directly felt it when they get a half elements of the book. You can choose the book Algebra and Trigonometry Enhanced With Graphing Utilities (4th Edition) to make your personal reading is interesting. Your own personal skill of reading proficiency is developing when you similar to reading. Try to choose straightforward book to make you enjoy to study it and mingle the opinion about book and reading especially. It is to be initially opinion for you to like to wide open a book and go through it. Beside that the reserve Algebra and Trigonometry Enhanced With Graphing Utilities (4th Edition) can to be your brand-new friend when you're truly feel alone and confuse with what must you're doing of their time.
