Cardiovascular Catheterization and Intervention: A Textbook of Coronary, Peripheral, and Structural Heart Disease

From Brand: Informa Healthcare

The field of invasive and interventional cardiology is dynamic with frequent advances in both technique and technology. An internationally-renowned team of editors and over 100 contributors have shaped this textbook to provide clinicians with a thorough guide that covers the procedural and peri-procedural aspects of coronary, peripheral, and structural heart disease diagnostics and interventions.

This comprehensive and highly illustrated textbook presents critical information for anyone active in the field of cardiovascular interventions, including:

- Practical suggestions on how to set up a cardiovascular catheterization laboratory, choose the right equipment and minimize radiation exposure.
- A careful analysis of the general principles of percutaneous coronary interventions, the specific knowledge needed in different clinical scenarios, as well as the patient selection criteria for each invasive procedure.
- In-depth coverage of non-coronary interventions, including 13 chapters on peripheral vascular interventions, including carotid artery stenting, as well as newer procedures for intracranial stenosis treatment, septal defect repair, and left atrial appendage closure.
- An incorporation of emerging procedures in structural heart disease, such as percutaneous aortic valve replacement and mitral valve repair?that although not presently mainstream, will likely become an important domain of interventional cardiologists.

Given the importance of appropriate training and credentialing for clinicians, the textbook also includes current national guidelines and policies on the performance of the various procedures.

Marco Roffi M.D. is Associate Professor of Medicine and Director of the Interventional Cardiology Unit at the University Hospital of Geneva, Switzerland.

David J. Moliterno, M.D. is Professor and Vice-Chair of Internal Medicine and Physician-in-Chief of Cardiovascular Services at the University of Kentucky.

Users Review

From reader reviews:

James Brecht:

What do you in relation to book? It is not important to you? Or just adding material when you need something to explain what the ones you have problem? How about your extra time? Or are you busy man? If you don't have spare time to accomplish others business, it is make you feel bored faster. And you have extra time? What did you do? Every person has many questions above. The doctor has to answer that question due to the fact just their can do that. It said that about book. Book is familiar on every person. Yes, it is right. Because start from on pre-school until university need this Cardiovascular Catheterization and Intervention: A Textbook of Coronary, Peripheral, and Structural Heart Disease to read.

Gale Taylor:

A lot of people always spent their particular free time to vacation or even go to the outside with them family or their friend. Were you aware? Many a lot of people spent that they free time just watching TV, or maybe playing video games all day long. If you would like try to find a new activity here is look different you can read some sort of book. It is really fun to suit your needs. If you enjoy the book you read you can spent all day long to reading a guide. The book Cardiovascular Catheterization and Intervention: A Textbook of Coronary, Peripheral, and Structural Heart Disease it doesn't matter what good to read. There are a lot of individuals who recommended this book. These people were enjoying reading this book. Should you did not have enough space to create this book you can buy the e-book. You can more effortlessly to read this book from the smart phone. The price is not to cover but this book possesses high quality.

Christina Ruiz:

Do you have something that suits you such as book? The book lovers usually prefer to choose book like comic, brief story and the biggest an example may be novel. Now, why not hoping Cardiovascular Catheterization and Intervention: A Textbook of Coronary, Peripheral, and Structural Heart Disease that give your enjoyment preference will be satisfied by simply reading this book. Reading habit all over the world can be said as the opportunity for people to know world a great deal better than how they react to the world. It can't be claimed constantly that reading habit only for the geeky person but for all of you who wants to end up being success person. So, for all of you who want to start reading as your good habit, it is possible to pick Cardiovascular Catheterization and Intervention: A Textbook of Coronary, Peripheral, and Structural Heart Disease become your personal starter.

Sandra Lynn:

The book untitled Cardiovascular Catheterization and Intervention: A Textbook of Coronary, Peripheral, and Structural Heart Disease contain a lot of information on this. The writer explains her idea with easy technique. The language is very easy to understand all the people, so do not really worry, you can easily read that. The book was compiled by famous author. The author provides you in the new era of literary works.
