Comet By Carl Sagan, Ann Druyan

WHAT ARE THESE GRACEFUL VISITORS TO OUR SKIES? WE NOW KNOW THAT THEY BRING BOTH LIFE AND DEATH AND TEACH US ABOUT OUR ORIGINS.

Comet begins with a breathtaking journey through space astride a comet. Pulitzer Prize-winning astronomer Carl Sagan, author of *Cosmos* and *Contact*, and writer Ann Druyan explore the origin, nature, and future of comets, and the exotic myths and portents attached to them. The authors show how comets have spurred some of the great discoveries in the history of science and raise intriguing questions about these brilliant visitors from the interstellar dark.

Were the fates of the dinosaurs and the origins of humans tied to the wanderings of a comet? Are comets the building blocks from which worlds are formed?

Lavishly illustrated with photographs and specially commissioned full-color paintings, *Comet* is an enthralling adventure, indispensable for anyone who has ever gazed up at the heavens and wondered why.

"SIMPLY THE BEST."

*The Times of London

"FASCINATING, EVOCATIVE, INSPIRING."

*The Washington Post

"COMET HUMANIZES SCIENCE. A BEAUTIFUL, INTERESTING BOOK."

*United Press International

"MASTERFUL . . . SCIENCE, POETRY, AND IMAGINATION."

*The Atlanta Journal & Constitution

From the Back Cover

Comet begins with a breathtaking journey through space astride a comet. Pulitzer Prize-winning astronomer Carl Sagan, author of *Cosmos* and *Contact*, and writer Ann Druyan explore the origin, nature, and future of comets, and the exotic myths and portents attached to them. The authors show how comets have spurred some of the great discoveries in the history of science and raise intriguing questions about these brilliant visitors from the interstellar dark.

About the Author

Carl Sagan (1934-1996) was the Director of Cornell University's Laboratory for Planetary Studies. He played a leading role in the American space program and was an adviser to NASA since its inception. He briefed the Apollo astronauts before their flights to the Moon, and was an experimenter on the Mariner,

Viking, Voyager, and Galileo expeditions to the planets. He helped solve the mysteries of the high temperatures of Venus (answer: massive greenhouse effect), the seasonal changes on Mars (answer: windblown dust), and the reddish haze of Titan (answer: complex organic molecules). For his work, Dr. Sagan received the NASA medals for Exceptional Scientific Achievement, and the Pulitzer Prize for The Dragons of Eden. His 1980 television series *Cosmos: A Personal Voyage* won the Emmy and Peabody awards. The National Science Foundation declared that his “research transformed planetary science... his gifts to mankind were infinite.”

Users Review

From reader reviews:

Timothy Rocha:

The book *Comet* make you feel enjoy for your spare time. You may use to make your capable much more increase. Book can to get your best friend when you getting pressure or having big problem using your subject.
