Diagnosis in Otorhinolaryngology: An Illustrated Guide By T. Metin Önerci

In preparing the material for this book, I took the advice of my students who generously shared their views and opinions with me. I was told that it would be preferable to have images of the various diseases with legends describing the disease. Students would be able to learn and retain the information more successfully if the material was accompanied by pictures and schematic drawings. Recent advances in technology have made it possible to photograph regions that are difficult to view with the naked eye, such as the ear, nose, throat, nasopharynx, and larynx – all the areas of otorhinolaryngology. Such an illustrated text in this field is important and necessary for teaching purposes. In this book I tried to compile images of the basic conditions that are commonly seen in general practice and to give the reader a visual survey with a brief description of the condition. I added tables and schematic drawings in order to provide practical information. It is not the purpose of this book to be a comprehensive textbook, since many textbooks are already available with more detailed information of the conditions illustrated here. This book is primarily intended for medical students, family and general practitioners, and ENT trainees. It may also serve as basic reading material for those in allied specialties. I hope my colleagues find this book useful and it contributes toward their teaching purposes.

Editorial Review

Review

From the reviews:

“This is a must have book for general practitioners, medical students and ENT trainees, both juniors and seniors alike. ... The legends at the bottom of every image are well written yet succinct, making it easy for the reader to grasp the information. ... this book succeeds in its aim of providing a picture atlas of the majority of ENT conditions. In my role as a clinician and an educator of medical students and ENT trainees, I would certainly use this book regularly.” (Asad Qayyum, ENT & Audiology News, 2013)

“This is a collection of images pertinent to the diagnosis of otolaryngologic diseases. ... The audience includes medical students, family and general practitioners, and ENT trainees. ... This is one of the most comprehensive collections of photographs and illustrations for otolaryngologic diseases.” (Alice Lin, Doody’s Review Service, February, 2010)

From the Back Cover

When making a diagnosis it is of paramount importance that the ear, nose and throat (ENT) specialist views the lesion and recognizes its pathology. Recent advances in endoscopic technology have enabled us to obtain clear pictures of such lesions and have changed our approach to diseases and techniques in the fields of ENT and head and neck surgery.

This atlas provides a pictorial survey with a brief reader-friendly structured text. It supports the beginner in their search for the correct diagnosis and increases the understanding required for basic surgical approaches. It is also a useful guide for all experts who teach their skills. A DVD with unique pictures and schematic drawings is included for teaching purposes.

Timothy Hardy:

People live in this new day of lifestyle always try to and must have the free time or they will get wide range of stress from both way of life and work. So , once we ask do people have time, we will say absolutely indeed. People is human not really a huge robot. Then we inquire again, what kind of activity are you experiencing when the spare time coming to you actually of course your answer can unlimited right. Then do you ever try this one, reading books. It can be your alternative inside spending your spare time, often the book you have read is definitely Diagnosis in Otorhinolaryngology: An Illustrated Guide.

Owen Neri:

As a scholar exactly feel bored to be able to reading. If their teacher expected them to go to the library or to make summary for some book, they are complained. Just minor students that has reading's heart and soul or real their interest. They just do what the instructor want, like asked to the library. They go to presently there but nothing reading very seriously. Any students feel that studying is not important, boring and can't see colorful pictures on there. Yeah, it is for being complicated. Book is very important to suit your needs. As we know that on this era, many ways to get whatever we wish. Likewise word says, many ways to reach Chinese's country. So , this Diagnosis in Otorhinolaryngology: An Illustrated Guide can make you feel more interested to read.
