## Drugs in Palliative Care (Oxford Medical Publications) By Andrew Dickman

While palliative care has adopted a holistic approach to treatment, medication driven symptom management ostensibly forms the critical aspect of care. Pharmacological therapy can be extremely complex because these patients often have co-existing medical conditions in addition to symptoms caused by their terminal disease. The resulting polypharmacy can be daunting for professionals and can negatively impact on effectiveness of care.

The practitioner requires a simple, easy to navigate reference source that provides succinct and pertinent drug information. This detailed yet concise handbook will appeal to a variety of healthcare professionals involved in the provision of palliative care and medicines information. It begins with an overview of pharmacology and prescribing advice then contains over 100 entries of palliative care drugs, in an easy to use A-Z format.

### **Editorial Review**

#### **Review**

'Overall, this book represents a lot of useful information in an accessible format. There is some overlap with existing resources, such as the British National Formulary and the Palliative Care Formulary, but this book is more concise, making information easier to access. Its focus on palliative care makes it most suitable for specialists in that field; however, the symptom management guides can also be useful for generalists.' - European Journal of Palliative Care

#### **About the Author**

Andrew Dickman is a Senior Clinical Pharmacist at the Liverpool Heart and Chest Hospital and Marie Curie Hospice in Liverpool. He is also a project lead at the Marie Curie Palliative Care Institute, University of Liverpool. Andrew is the co-author several books, including the Syringe Driver, the Palliative Care Formulary (PCF2) and Chronic Pain, part of the Oxford Pain Management Library. He has also contributed chapters to several books, including the Care of the Dying, Wall and Melzack's Textbook of Pain and the new textbook, Palliative Medicine. His job involves clinical work, research and education and he is currently undertaking a Doctorate in Pharmacy Practice.

### **Users Review**

#### **From reader reviews:**

##### **Stephan Partin:**

Information is provisions for people to get better life, information nowadays can get by anyone on everywhere. The information can be a understanding or any news even an issue. What people must be consider whenever those information which is inside former life are difficult to be find than now is taking seriously which one is acceptable to believe or which one often the resource are convinced. If you have the unstable resource then you buy it as your main information there will be huge disadvantage for you. All those possibilities will not happen inside you if you take Drugs in Palliative Care (Oxford Medical Publications) as your daily resource information.

##### **Thomas Stewart:**
