**Newnes Building Services Pocket Book (Newnes Pocket Books)** By John Knight, W.P. Jones

Newnes Building Services Pocket Book is a unique compendium of essential data, techniques and procedures, best practice, and underpinning knowledge. This makes it an essential tool for engineers involved in the design and day-to-day running of mechanical services in buildings, and a valuable reference for managers, students and engineers in related fields.

This pocket reference gives the reader access to the knowledge and knowhow of the team of professional engineers who wrote the sixteen chapters that cover all aspects of mechanical building services. Topic coverage includes heating systems, ventilation, air conditioning, refrigeration, fans, ductwork, pipework and plumbing, drainage, and fire protection. The result is a comprehensive guide covering the selection of HVAC systems, and the design process from initial drafts through to implementation.

The second edition builds on the success of this popular guide with references to UK and EU legislation fully updated throughout, and coverage fully in line with the latest CIBSE guides.

## **Editorial Review**

### **Review**

#### **Reviews of Previous Edition:**

"This pocket book is filled with comprehensive reference material for building services students, mid-career engineers and those involved with operating and managing mechanical building services." Campus Construction

From Amazon (5-star review)

"For a very small book, it covers a lot of ground, in more than adequate detail. Plumbing, A/C and drainage are all there. Definitely a very handy little pocket design guide." Engineer, Dubai
