Teaching and Learning K-8: A Guide to Methods and Resources (9th Edition) By Richard D. Kellough, John D. Jarolimek

Teaching and Learning in the Elementary School is built on the most current research and "best" practice. It thoroughly examines all of the fundamental teaching skill categories - planning for instruction, assessing student learning, grouping for instruction, and creating a safe and effective learning environment - while constantly reinforcing the idea that effective elementary school teaching requires continual, thoughtful, and reflective decision-making. In this popular volume, three well-known authors paint a realistic portrait of elementary school teaching as a call to motivate, to encourage, to simulate, to build self-esteem, and to care for elementary school children. For General Elementary Methods courses.
