Little is known--and less has been published--about American submarine espionage during the Cold War. These submerged sentinels silently monitored the Soviet Union's harbors, shadowed its subs, watched its missile tests, eavesdropped on its conversations, and even retrieved top-secret debris from the bottom of the sea. In an engaging mix of first-rate journalism and historical narrative, Sherry Sontag, Christopher Drew, and Annette Lawrence Drew describe what went on.

"Most of the stories in *Blind Man's Bluff* have never been told publicly," they write, "and none have ever been told in this level of detail." Among their revelations is the most complete accounting to date of the 1968 disappearance of the *U.S.S. Scorpion*; the story of how the Navy located a live hydrogen bomb lost by the Air Force; and a plot by the CIA and Howard Hughes to steal a Soviet sub. The most interesting chapter reveals how an American sub secretly tapped Soviet communications cables beneath the waves. *Blind Man's Bluff* is a compelling book about the courage, ingenuity, and patriotism of America's underwater spies. --

From Publishers Weekly

In an unusually successful amalgam, veteran journalists Sontag and Christopher Drew combine a gripping story with admirable research to relate previously unknown information. Throughout the Cold War, the U.S. depended heavily on submarines for intelligence gathering, whether tracking Soviet missile subs, monitoring Soviet harbors and missile tests or, in some cases, retrieving lost Soviet equipment. The U.S.S.R. responded with everything from comprehensive espionage operations to depth charge attacks on particularly intrusive snoopers. The broad outlines of this clandestine confrontation are relatively familiar, but the details have largely remained secret. Although the authors have based their book largely on interviews with submariners, intelligence operatives and politicians, they recognize the possibility of distortion and back up personal accounts with an elaborate and convincing system of verification. While necessarily incomplete, the resulting work depicts what was arguably the most successful long-term, large-scale intelligence operation in American history. From captains to seamen, the participants combined technical proficiency, insouciant courage and a cheerful scorn for regulations that often interfered with their missions. That mind-set was hardly calculated to avoid direct confrontations, and accidental collisions were not uncommon. The authors nevertheless make a solid case that the risk of a destabilizing incident was far outweighed by the gains of the campaign?especially given the depth of mutual ignorance during the Cold War.

From Library Journal

Journalists Sontag and Drew have strung together about a dozen investigative pieces on submarine espionage activities during the Cold War era. The stories are exciting, the personalities border on the eccentric, and the constant turf battles among various U.S. government agencies in these often top-secret submarine activities make for intriguing reading. Have you ever wondered what it must be like to stalk a Soviet sub armed to the teeth with nuclear missiles? Or serve on a U.S. sub in Russian waters with Soviet antisubmarine ships using you for target practice? While these true-life stories are exciting, much of the book is actually an account of how the CIA, U.S. Navy, Congress, and other agencies all used the American submarine force to further their own political ends. While not packing the literary punch or style of Edward L. Beach's World War II naval classic *Run Silent, Run Deep*, this is hard-core investigative reporting at its crispest. Highly recommended for all public and academic libraries.?Stephen W. Green, Auraria Lib., Denver
