International Handbook on the Economics of Integration: Factor, Mobility, Agriculture, Environment and Quantitative Studies From Brand: Edward Elgar Pub

With this Handbook, Miroslav Jovanovic has provided readers with both an excellent stand-alone original reference book as well as an integral part of a comprehensive three-volume set. This introduction into a rich and expanding academic and practical world of international economic integration also provides a theoretical and analytical framework to the reader, presenting select analytical studies and encouraging further research. International Handbook on the Economics of Integration, Volume III covers three broad themes: factor mobility (transnational corporations and labour migration); agriculture and environment; and quantitative studies of integration effects. A removal of barriers for the mobility of factors in certain integration arrangements among countries has an impact on the mobility of capital, firms and individuals within the group. Various aspects of this factor mobility are analysed in eight detailed chapters. The second theme of the Handbook is devoted to agriculture and environment. This is of great global relevance as the Common Agricultural Policy of the EU has been a bone of contention in international relations over several decades. Finally, seven quantitative studies of the effects of integration attempt to measure various potential benefits of regional integration efforts. Contributors to this major reference work include eminent authors, some of whom contributed to the creation of economic integration theory from the outset. The authors not only survey the literature, but also present their own arguments and new ideas in order to offer a new perspective, as well as discussing the issues they believe are essential in the field. Each of the insightful chapters is approachable not only to graduate students, scholars, researchers and policymakers, but also to advanced undergraduate students.

Editorial Review

Review

'This Handbook provides a comprehensive tour and in-depth analysis of the principal economic dimensions of economic integration and the global economy. Due to diverse range of themes dealt with by the Handbook's authors it is inevitable that the reader may agree or disagree with the expressed views, but in this lies the Handbook's significance in that it will inspire more research, articles and books on the subjects covered. In sum, the Handbook provides a wide array of source material and information for potential future research. I would recommend this Handbook to every university library and anyone, scholars and practitioners alike, interested in the far-reaching strands of international economics and integration.' -- Isidora Ljumovic, Journal of Economic Integration 'International Handbook on the Economics of Integration edited by Miroslav Jovanovic provides timely and rich academic contributions to considerations of the widest array of integration-related issues. European integration has been providing an inspiration to a number of academics and researchers. The Handbook is a recognition of the dynamic and strong solidarity of European integration. At the same time, the European Union often provided an example for integration schemes throughout the world which spread enormously since the mid-1990s. Leading experts from all continents contributed to this Handbook which will be a valuable input into academic and policy-making discussions and actions.' -- Jose Manuel Barroso, President of the European Commission 'Miroslav Jovanovic's publication represents a rich contribution to the complex issue of regional integration, its benefits, its shortcomings, and its relationship with multilateral trade opening. It sheds light over an issue which is the subject of intense discussions in trade circles.' -- Pascal Lamy, Director-General of the WTO 'Much has been written on trade agreements as a mechanism to integrate the markets of two or more countries - often inspired by the European example. In recent years, attention has increasingly focused on the importance of economic geography as a determinant of industrial location. This book combines the two strands of analysis, bringing together leading experts in the fields of economic geography and international trade. The result is an outstanding compilation of papers that illuminate how policies and economic forces affect the location of economic activity in an integrated Europe.' -- Bernard Hoekman, Director, The World Bank, US 'The open multilateral trading system is a tremendous success of the past half century, and has contributed greatly to the world's unprecedented rate of economic growth. Over the past two decades however, preferential trading arrangements have proliferated, raising questions as to how compatible they are with the open multilateral system, and what policies might be adopted to improve outcomes. The essays in this volume detail the emergence of PTAs and provide comprehensive and up-to-date analyses of the state of play of preferential arrangements in all regions of the world. The volume will provide a useful reference for all those wanting to understand existing preferential arrangements and their role in the international economy today.' -- Anne O. Krueger, Johns Hopkins University and Stanford University, US 'Economic integration is a complex and multifaceted giant, with a myriad aspects ranging from regional and global concentration and dispersal of economic activity to social and political consequences for individuals and communities in developed and developing countries alike. This landmark, three volume collection of chapters by leading authors, drawn from many fields, is a worthy and timely contribution to the analysis of a phenomenon with profound implications for the future world economy - and its governance.' -- James Zhan, Director, Investment & Enterprise Division, UNCTAD

About the Author

Edited by Miroslav N. Jovanovic, United Nations Economic Commission for Europe, Geneva, Switzerland and Global Studies Institute, University of Geneva, Switzerland

Users Review

From reader reviews:

Eloise Torres:
