## **Editorial Review**

Review

"The foremost reference for the practitioner caring for the neurosurgical patient." - The Spine Journal, review of the last edition

"An invaluable reference for those seeking specialist experience in neuroanaesthesia...A 'must have' for departments of neuroanaesthesia...Most practising neuroanaesthetists will wish to own their own copy." - British Journal of Anaesthesia, review of the last edition

"This fifth edition of Cottrell and Young's Neuroanesthesia is a tour de force of contemporary neuroanesthesia, an invaluable resource for clinicians working in neuroanesthesia and critical care. It also is a best buy for any serious student of the clinical neurosciences and a must-have for neuroanesthesiologists." - David P. Strum, MD, FRCPC- JAMA

"...the new edition of Neuroanesthesia represents the best aspects of a modern textbook, namely a clear, concise format, excellent summary figures and tables, improved aesthetic value, and an option to access contents online... this book should be required reading for all anesthesiologists who care for neurosurgical and neurologically impaired patients. Simply put, Cottrell and Young's Neuroanesthesia provides a solid foundation for state-of-the-art neuroanesthetic care." - John F. Bebawy, Antoun Koht, International Anesthesia Research Society

"This is a book which anaesthetists involved in clinical neuroanaesthesia should own, and which department libraries should buy. It provides practical clinical guidance, acts as a data source for clinical decisions and contains sections on the basic sciences to those at that stage of training. Lastly, it is very readable a feature without which the best information can fail to make an impact." - G Ludbrook- Adelaide, South Australia- Anaesthesia and Intensive Care

"It is for those who want to provide the highest level of care for their patients by truly understanding why they do what they do. This approach to neuroanesthesia will allow one to adapt and handle any clinical situation that arises in a confident and intelligent fashion." - Brian P. Lemkuil, M.D., University of California, San Diego- American Society of Anesthesiologists

"...provides a comprehensive update of the latest developments in the field. This is one of the definitive textbooks of neuroanaesthesia and should be available in every departmental library." - M. Smith, Professor in Neuroanaesthesia and Neurocritical Care, Journal of the Association of Anaesthetists of Great Britain and Ireland
