Editorial Review

From the Back Cover

The Ultimate JavaServer Faces Resource

Deliver feature-rich, cross-browser Internet applications using JavaServer Faces (JSF) and this one-stop guide. Written by experts directly involved in developing this important technology, *JavaServer Faces: The Complete Reference* fully explains every aspect of JSF.

The book begins with a fast-paced introduction so you can get your first JSF application up and running quickly. Then, each aspect of JSF is examined in depth, including the request processing lifecycle, page navigation, component development, AJAX, validation, internationalization, and security. Throughout, Expert Group Insights offer an insider's view into the design of JSF. Inside you'll find:

- Comprehensive coverage of the JSF lifecycle, managed beans, expression language (EL), the Faces event, UI component, and navigation models
- Techniques for transforming and processing data from disparate sources using converters and validators
- A complete, integrated sample application to use as a model for your own JSF applications, with code available online
- Instructions on how to use Hibernate to integrate JSF with production-quality databases
- Details on building AJAX-enabled custom UI components, complete with numerous examples
- Instructions for extending Faces by building custom non-UI components ranging from validators and converters to NavigationHandlers and ViewHandlers
- Techniques for debugging and developing automated software tests for JSF applications
- Extensive discussions of third-party Faces technologies, including MyFaces, ADF Faces, Facelets, Shale, and Faces-enabled IDEs
- Detailed coverage on security (using JAAS), accessibility, internationalization, and localization with JSF

About the Author

Chris Schalk is a principal product manager and lead JSF evangelist for Oracle's application server and development tools division.

Ed Burns is a senior staff engineer at Sun Microsystems, Inc., and has led the development of JavaServer Faces technology since its inception. He currently co-leads a team of experts from across the industry in the continued development of JSF.

James Holmes is a leading Java Web development authority. He is a committer on the Struts project and the author of *Struts: The Complete Reference*.

Edited by **Herbert Schildt**, Java authority and bestselling author of *Java: The Complete Reference*.

Users Review

From reader reviews:

Jeffrey Evans:

Do you considered one of people who can't read pleasant if the sentence chained within the straightway, hold on guys that aren't like that. This JavaServer Faces: The Complete Reference (Complete Reference Series) book is readable by simply you who hate those perfect word style. You will find the information here are arrange for enjoyable studying experience without leaving actually decrease the knowledge that want to deliver to you. The writer involving JavaServer Faces: The Complete Reference (Complete Reference Series) content conveys the idea easily to understand by lots of people. The printed and e-book are not different in the content material but it just different such as it. So , do you even now thinking JavaServer Faces: The Complete Reference (Complete Reference Series) is not loveable to be your top checklist reading book?

Johnny Rogowski:
