Applied Methods of Cost-effectiveness Analysis in Healthcare (Handbooks in Health Economic Evaluation Series) By Alistair M. Gray, Philip M. Clarke, Jane Wolstenholme, Sarah Wordsworth

The third volume in the Handbooks in Health Economic Evaluation series, this book provides the reader with a comprehensive set of instructions and examples of how to perform an economic evaluation of a health intervention. It focuses solely on cost-effectiveness analysis in health care. The book is developed out of the Advanced Methods in Economic Evaluation course taught at the University of Oxford, and the four main sections mirror the four principal components of the course: Outcomes, Costs, Modelling using decision trees and Markov models, and Presenting cost-effectiveness results.

ABOUT THE SERIES

Series editors Alastair Gray and Andrew Briggs

Economic evaluation of health intervention is a growing specialist field, and this series of practical handbooks tackles, in depth, topics superficially addressed in more general economics books. Each volume includes illustrative material, case histories and worked examples to encourage the reader to apply the methods discussed, with supporting material provided online. The series is for health economists in academia, the pharmaceutical industry and the health sector, those on advanced health economics courses, and health researchers in associated fields.

Editorial Review

About the Author

Alastair Gray was appointed Director of the Health Economics Research Centre, Division of Public Health and Primary Care, University of Oxford, in October 1996, and became Professor of Health Economics in 2002. He has previously held appointments at the University of Aberdeen (where he completed his PhD), the Open University (where he was on the core team of the successful Health and Disease course) and the London School of Hygiene and Tropical Medicine. He teaches and supervises undergraduate and graduate students, and on HERC short courses in Oxford and abroad. He has acted as adviser to the WHO and other agencies. Dr Philip Clarke joined the School of Public Health, University of Sydney in February 2006 after spending six years engaged in health economic research at the University of Oxford. While based in Oxford he was primarily involved in the economic analysis of the United Kingdom Prospective Diabetes Study (UKPDS) a landmark trial of policies to improve the management of people with Type 2 diabetes. His health economic research interests include developing methods to value the benefits of improving access to health care, health inequalities and the use of simulation models in health economic evaluation. He has also undertaken policy relevant research for the World Bank and the OCED. Jane Wolstenholme joined the Health Economics Research Centre in December 1998, having previously worked at the University of Nottingham. Her main research interests lie in the areas of economic evaluation and health technology assessment from applied and methodological perspectives. During 2005 she was engaged on projects in modelling cost-effectiveness of prostate cancer screening and cervical cancer screening; economic evaluation alongside a RCT for the treatment of subarachnoid aneurysm; and assessing the usefulness of cost-effectiveness data in priority setting.

Users Review

From reader reviews:

Sam Current:
