

The Goal: Excellence In Manufacturing

By Eliyahu M Goldratt, Jeff Cox

THE GOAL

Excellence In Manufacturing

"The Goal" is about the OPT principles of manufacturing. It's about trying to understand what makes our world tick so that we can make it better. When we think logically and clearly about what's above us, we can determine the "cause and effect" relationships between actions and results.

Using the OPT principles we can compete with anyone. The western world does not have to become a second or third rate manufacturing power if we just understand and apply these principles.
